

PKM CONSTRUCTIONS

ENGINEERING
PROGRESS

BUILDING FOR
GENERATIONS

60+ YEARS • 3 GENERATIONS • TAMIL NADU

BUILT FOR INFRASTRUCTURE THAT MATTERS

PKM Constructions is a family-led civil engineering and construction enterprise delivering important public, institutional and environmental infrastructure across Tamil Nadu.

Our approach combines experienced leadership, practical planning, disciplined execution and accountability throughout the project lifecycle.

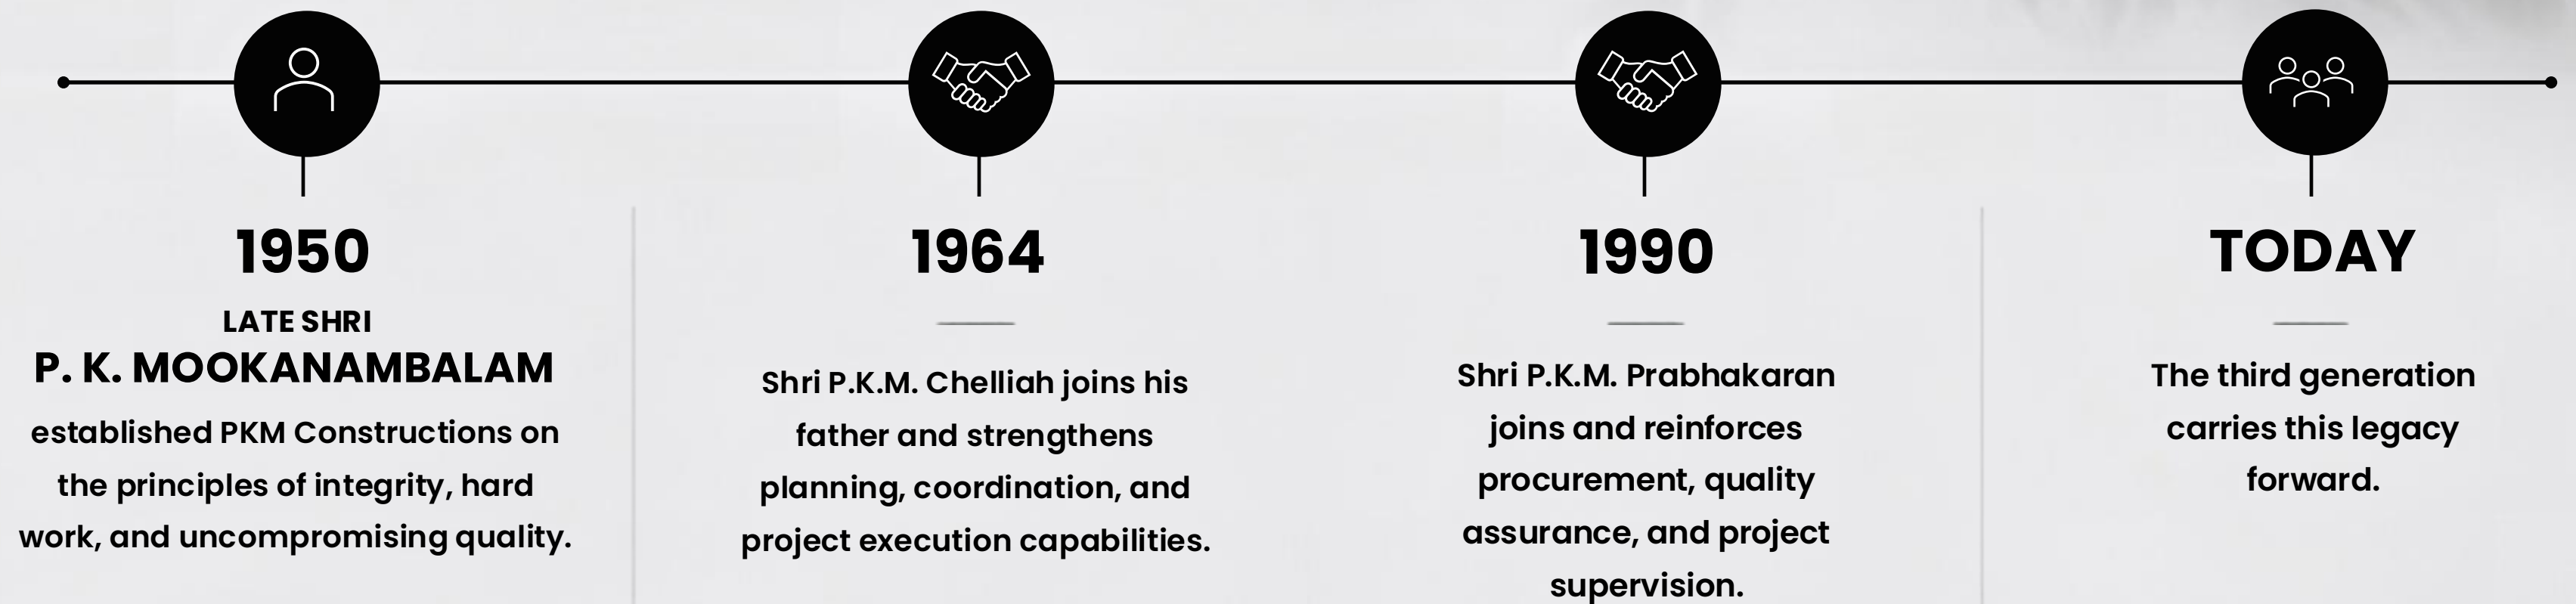

WE BUILD INFRASTRUCTURE DESIGNED TO SERVE COMMUNITIES AND CREATE LASTING VALUE.

A VISION CARRIED FORWARD THROUGH GENERATIONS

BUILT ON INTEGRITY. STRENGTHENED BY GENERATIONS. DRIVEN BY PURPOSE.

MISSION

To deliver every project with integrity, engineering discipline, quality, safety, and accountability—while continuously improving how we plan, build and collaborate.

VISION

To build infrastructure that strengthens communities, supports progress and creates lasting value for generations

CORE CAPABILITIES

EXPERTISE ACROSS ESSENTIAL INFRASTRUCTURE

Roads, Bridges & Urban Mobility

Bridges, grade separators and transport infrastructure that improve movement and connectivity.

Public & Institutional Buildings

Functional and durable facilities for public agencies, educational institutions and established organizations.

Water & Environmental Infrastructure

Large-scale treatment and water-management systems supporting dependable urban services.

Industrial & Specialized Construction

Technically demanding civil works requiring careful coordination, quality control and reliable execution.

PKM CONSTRUCTIONS

WHY CHOOSE PKM

Leadership Involvement

Senior leadership remains closely connected to planning and execution.

Practical Project Planning

Requirements, resources and construction sequencing are considered from the outset.

Quality Led Execution

Procurement, supervision and inspection support consistent construction standards.

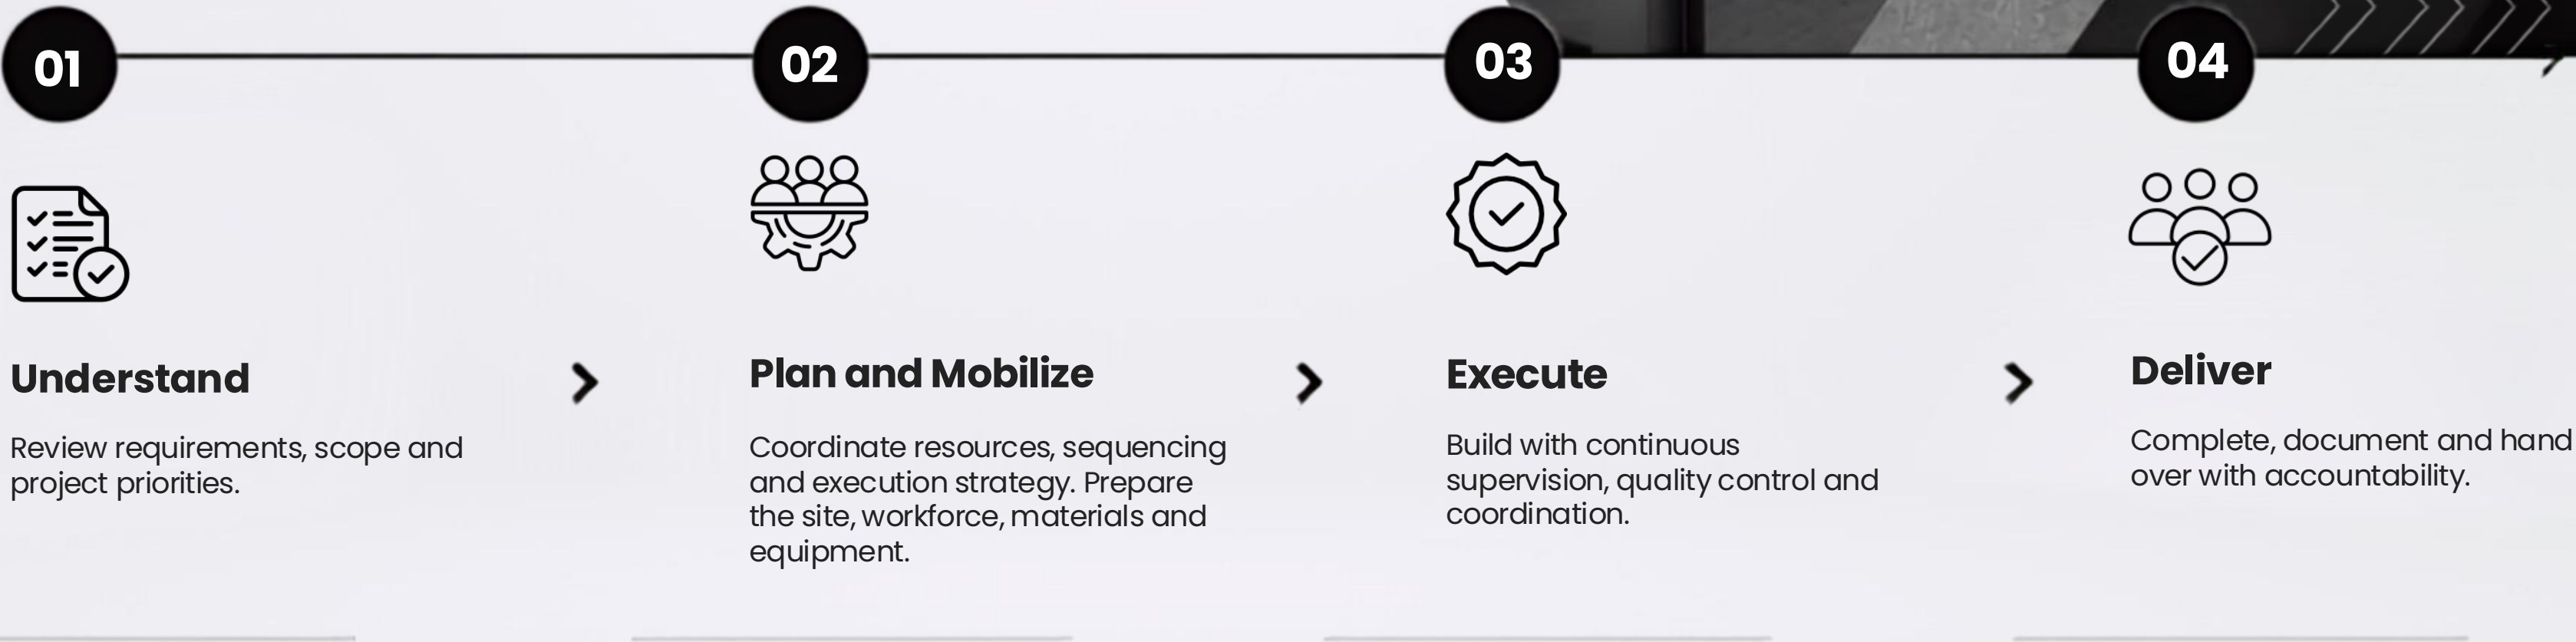

Accountability at every stage

Responsibility extends from pre-construction planning through completion and handover.

OUR PROCESS

OUR PROCESS

Subhash Chandra Bose Bridge – Madurai

Engineering the future of infrastructure:

We are proud to have delivered Madurai's landmark Subash Chandra Bose bridge and flyover system. The newly inaugurated ₹213.80-crore project stands as a benchmark of our technical prowess in heavy civil construction. Overcoming complex urban zoning and heavy traffic conditions, we constructed a robust 61-pier, multi-arm network that directly decongests Madurai's core transit nodes. From complex foundation piling to precision girder placement, this mega-project cements our legacy as builders of elite, high-impact transport corridors.

Ukkadam Grade Separator – Coimbatore

Engineering urban breakthroughs:

The Ukkadam Grade Separator complex highlights our prowess in executing high-value, highly complex transport infrastructure. Overcoming dense utility grids and strict spatial constraints, we engineered a 3.8 km elevated network built to safely handle heavy regional traffic corridors. From precision pier placement adjacent to the redeveloped Ukkadam Bus Stand to specialized ramp design, this structural marvel stands as an enduring testament to our dedication to structural safety, technical precision, and future-proof civic engineering.

TVS Lakshmi Schools

Expanding our footprint into elite institutional infrastructure:

we successfully delivered the sprawling educational campuses for Lakshmi Vidya Sangham (TVS Group) in Madurai. This high-value civil contract included the foundational development and structural execution of Lakshmi School's expansive 42-acre campus at Veerapanchan, alongside modern architectural phases for The TVS School (formerly TVS Lakshmi Matriculation HSS). Managing complex zoning layouts, we constructed state-of-the-art academic wings, resource blocks, and sports zones, demonstrating our ability to balance heavy structural load requirements with the intricate design safety standards required for world-class educational spaces

LEADERSHIP ACROSS GENERATIONS

Shri PKM Chelliah
*Co-Founder and Senior
Managing Partner*

QUALITY, SAFETY & SUSTAINABILITY

Quality

Careful planning, material control, supervision and inspection throughout construction.

Safety

A disciplined site culture focused on protecting employees, partners and surrounding communities.

Sustainability

Durable construction, responsible resource use and infrastructure designed for long-term community value.
